Subject: From my perspective

Dear Steve,

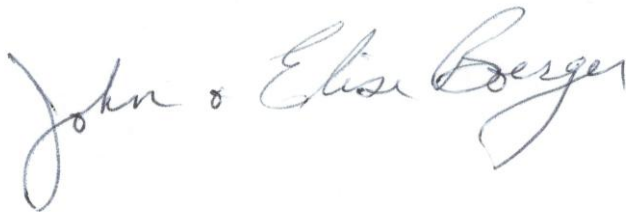

When a husband hears that it is time to update/remodel the kitchen, the first and primary thought is normally, OH MY GOSH. With *your* involvement my fear that it was going to end badly, disappeared.

You were there from the initial design phase, demolition, and construction of the entire process. Because of the talent and innovation you personally provided, we are more than happy with our new kitchen and remodel throughout the house.

If this letter of support is helpful, please have any prospective clients call us directly to advise them that they should not proceed without your talent and the confidence you bring to the project. You gave us a sense of ease.

Thank you so much.
